

## VCE™ IsoFlex Mountings

Heavy Duty, cast steel isolators for heavy static loads and non-thrust bearing applications such as large stationary machinery, compactors, recycling shredders, total energy units, floating compartments, deck houses and floors.

**VCE™** series mounts feature two unique replaceable rubber elements. This allows a hybrid of rubber hardness on any mounting point to achieve maximum isolation. This also provides maximum serviceability without demounting

and replacing the entire isolator.

Industrial AC Units

Generator Set Enclosures

## VCE™ IsoFlex Mountings

**VCE™** series mounts feature extreme heavy weight construction and capacity. The cast steel construction and unique replaceable rubber elements allow a static load range of 150-50,000 Kg. **VCE™** mounts are suitable for large generator set and heavy machinery installations or for mounting of isolated cabins and deckhouses.

**VCE™** mounts are also recommended for large NON THRUST BEARING marine propulsion engine installations in combination with a thrust block and flexible coupling.
